

# SEWALL POND

Arrowsic Twp., Sagadahoc County  
U.S.G.S. Phippsburg, Maine

## Fishes

Largemouth bass  
White perch  
Yellow perch  
Chain pickerel  
Minnows  
Golden shiner

White sucker  
Pumpkinseed sunfish  
American eel  
Sea-run alewife

## Physical Characteristics

Area - 46 acres

Maximum depth - 11 feet

Temperatures:

Surface - 77°F

10 feet - 74°F

Principal fisheries: White perch, yellow perch

Although largemouth bass have been reportedly caught at Sewall Pond, none were captured during a routine field survey of 1993. Additional survey work should be done to determine the presence of bass; if no bass are present an introduction should be considered.

Sewall Pond serves as a spawning site for adult sea-run alewives that enter the pond each spring. The culvert and outlet stream should remain clear of any obstructions to facilitate alewives easy migration into the pond.

Public access to Sewall Pond is along state road route 127.

Surveyed - August, 1955

Revised - 1998
